

TST have been designing and manufacturing trailers to transport Windsurf, Canoe, Kayak and Mountain bikes since 1997. As we are active in these sports we understand our customers requirements.

Each trailer is built to order allowing us to build in any modifications a customer may require. All trailers are professionally galvanized giving long lasting protection. T.S.T build a wide range of trailers from a single kayak trailer up to trailers for 8 Canadians. In October 2012 new legislation came into force regarding trailers. All trailers first used after October 2012 must be approved before they can be used on the road. Each trailer we build is inspected by VOSA and Certificate issued. Further details at
